

Job Description – IBM Power Consultant

About Recarta IT Limited:

Recarta IT was established in 2005 and currently holds its head office in Ranmore Common (Dorking) with additional offices in Bristol, Manchester and Guernsey.

Recarta has three key strategies.

1. To scope, supply and integrate Enterprise Server and Storage Solutions.
2. Provide hosting, professional services and managed services to a wide range of clients in across many sectors
3. Supply and renew a wide range of Vendor, hardware & software maintenance alongside Vendor software licensing, compliance and renewals.

The company has continued to grow in all areas of the business and group revenues of £17.5M in our current year ending end of March 2025. Recarta currently works with over 200 clients annually, servicing public sector, manufacturing, distribution, financial and retail sectors. Recarta currently employs circa 50 people including technical and sales consultants.

Recarta is looking for an experienced IBM Power Consultant specialising in IBMi to join our growing technical team. Recarta has over 150 IBMi clients and we are a trusted partner to many of these and an extension of their IT team managing their mission critical systems.

Key Deliverables

As an IBMi Power Consultant, you will play a key role in delivering IBM Power infrastructure solutions, working across IBMi (iSeries, AS/400) environments and Power Virtual Systems (Power VS). This role involves providing consultancy and support across a range of client projects, including migrations, virtualisation, and system optimisation.

Location:

This is a fully remote role, offering a fantastic opportunity to work with cutting-edge IBM Power Systems technologies while enjoying the flexibility of home-based working.

Reporting to:

Technical Director

Main Purpose of Job:

- Design, implement, and support IBM Power Systems solutions, with a strong focus on IBMi / iSeries / AS400.
- Assist in the deployment and configuration of Recarta's Power Cloud and IBM Power Virtual Server (Power VS) platforms.
- Work closely with clients and internal stakeholders to deliver tailored solutions.
- Provide expert-level troubleshooting and performance tuning.
- Participate in migrations, upgrades, and disaster recovery and high-availability planning.

Training given:

We will give you plenty of assistance to understand the processes and programs of our vendors and partners. We encourage the development of all employees with webinars and external events where relevant.

Successful Candidate:

- Strong hands-on experience with IBM Power Systems (IBMi) and Storage
- Solid understanding of Power Cloud and IBM Power Virtual Server (Power VS).
- Experience of working in a managed service or consultancy environment is beneficial.
- Excellent problem-solving and communication skills.
- Ability to work independently in a remote environment.

Hours Required:

This position is full-time.

Terms and Conditions:

To be discussed but will be highly competitive.
